REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggest providing for a process for mapping hardware resources to logical resources, which has an abstraction between hardware resources and logical resources, wherein the logical model comprises a hardware model, a software model, and service endpoint model that spans the hardware and software model, wherein the logical model is used as input to a code generate to create a view and an API for each of the processes that require configuration data. The code generate also constructs a data definition language file which is used to construct various tables and view within the configuration database. The logical model is constructed in a Unified Modeling Language (UML). When the logical model is changed to include models representing new software and hardware, the code generator can use the new logical model to regenerate new view id's and APIs for each application. The logical model utilizes a layer of abstraction between the hardware resources and the functional processes, and the functional processes are decoupled from the logical model via a second layer of abstraction. For these reasons, in conjunction with the other limitations of the independent claims, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
